Education

Aditya College of Engineering and Technology

june 2023 – present

CGPA:7.45/10 <https://examsection.acet.ac.in/StudentLogin/Student/overallMarks.aspx>

Coursework:Electronics and Communicational Engineering

Skills Summary

- Languages: C,Python,Java,SQL(basics),OS(basics)
- Tools: Power Point, MYSQL.
- Platforms:Visual Studio,Jupyter Notebook
- Soft Skills: Good communication skills, Eloquent in 3+ languages,

Work experience

Full Stack Development Intern

May 2025 – June 2025

- I am currently an intern at Technical Hub (Thub) in Full Stack Development with a focus on React Native. (a link to somewhere)
- I was selected for the internship through a competitive examination conducted in my college.
- During the internship, I'm actively working on real-time projects and enhancing my development skills.
- The program is helping me gain strong hands-on experience in front-end and mobile app development.
- I'm also improving my teamwork, problem-solving, and coding proficiency every day.

Projects

Faculty Locator

June 2025 - August 2025

- As part of my internship at Thub, my team and I developed a web app that helps students locate faculty within the campus.
- We collaboratively worked on the idea from scratch — from planning to implementation.
- I contributed to both the front-end design.
- The project improved our teamwork, problem-solving, and real-world development skills.
- It was a valuable experience in turning an idea into a practical solution during our internship.

TraceLy

June 2025 -

- We're currently working on the idea for an app called TraceLy, designed to help users find lost items, people, or belongings within a specific area.
- The goal is to create a reliable platform that combines smart location tracking with real-time alerts.
- It aims to be useful in everyday situations—whether it's locating a misplaced item or reconnecting with someone nearby.
- The concept focuses on safety, convenience, and quick accessibility.
- Though still in the ideation stage, we're exploring how to turn this into a practical solution using mobile technologies.

certifiacations

Cisco-netacad

Certified in C at Cisco Netacad

Codechef

certified in codechef for solving 500+ rated problems

Haker Rank

5 Star Badge in c Coding problems
